

Tomic (invest)

request :

[PIBserver](#) + sessionPath (from entitlements) ? [sessionParam](#) from the entitlement for "securities"

response :

```
{
  "header": {
    "type": "object",
    "properties": {
      "statusCode": {"type": "string"},
      "token": {"type": "string"},
      "errorMsg": {"type": "array"}
    }
  },
  "body": {
    "type": "object",
    "properties": {
      "cgi": {"type": "string"}, //not used
      "crypto": {"type": "string"} //sso to send to Natixis to get on Tomic
    }
  }
}
```

IMPORTANT INFORMATIONS :

1. This function is a CAM40 only one => stepup required
2. This function is just "launching" Tomic in an external browser pre-authenticated => URL to call is [PIBserver](#) + "emmob?Appl=WEBACCMOB?Mob=" + the crypto received in the JSON message. PIB will automatically redirect to Tomic.
